

## PACKAGE CONTENT

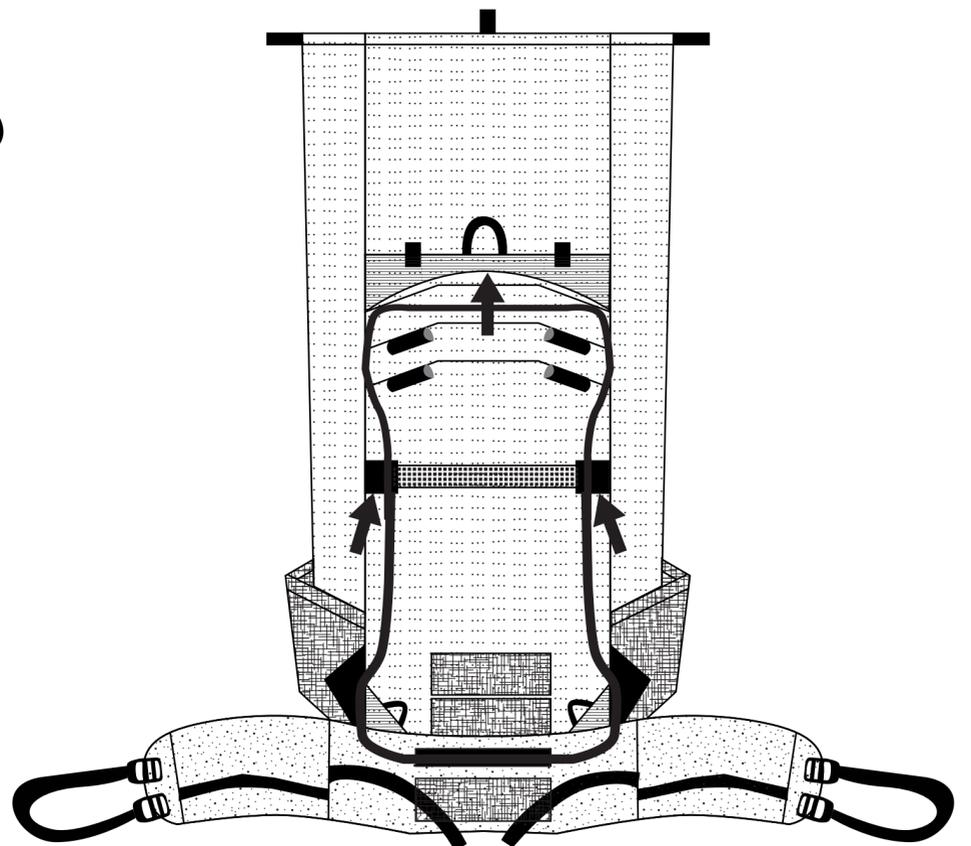

- A: Backpack Main Body
- B: Hipbelt
- C: Shoulder Straps
- D: Waist Pad
- E: Frame
- F: Load Lifters
- G: UHMWPE Cord(Option 1 for backpanel)
- H: Mesh Backpanel(Option 2 for backpanel)

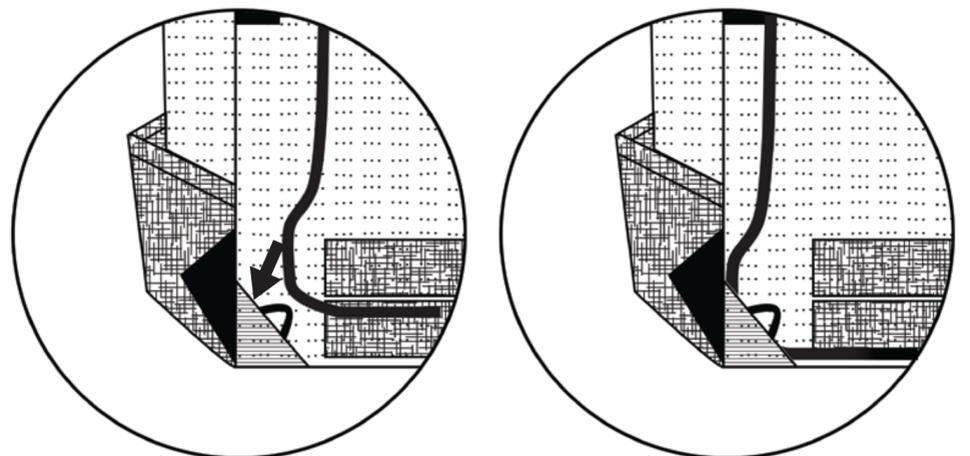

1. Assemble the top half of the frame(E) and insert it into the section indicated by the arrows on both sides in the middle of the pack.

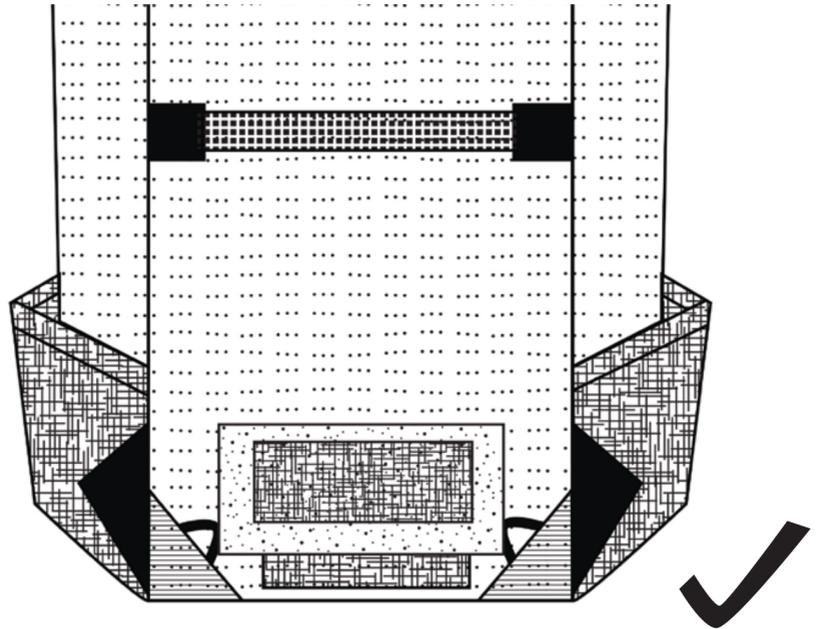

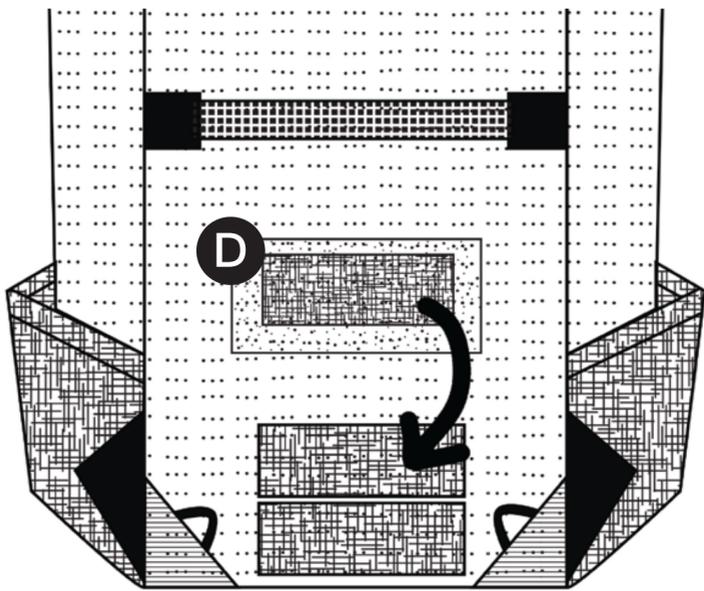

2. Assemble the lower part of the frame(E) and insert it into the black cloth tube hipbelt(B) as instructed.

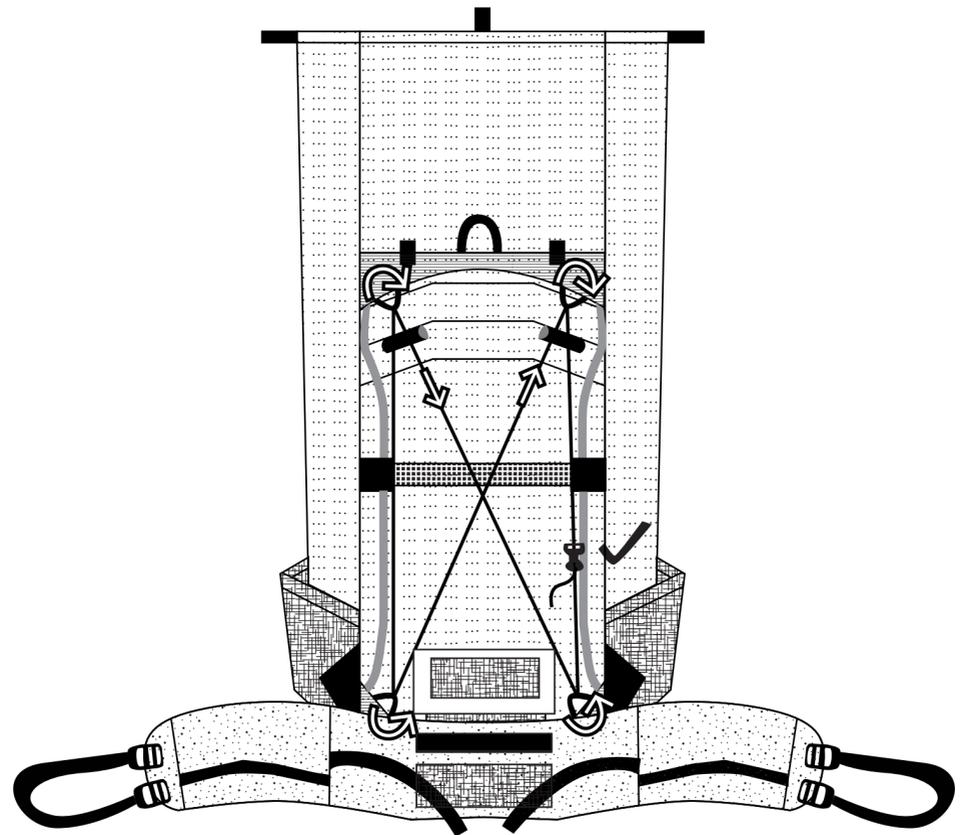

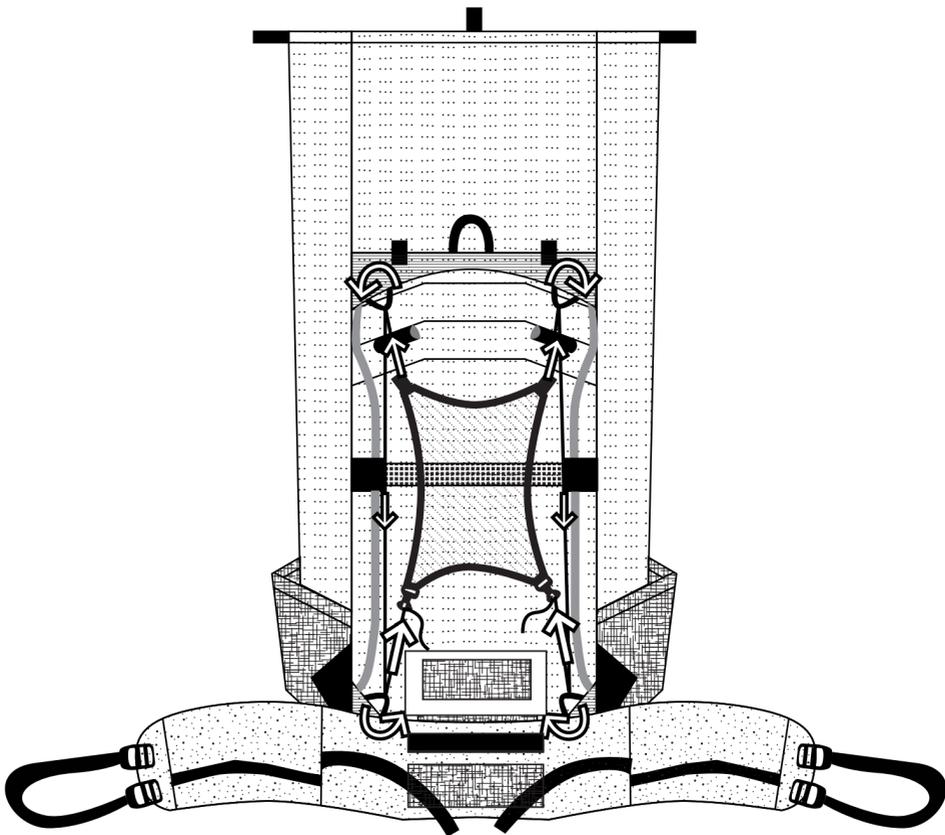

3. Tuck the top part of the frame inside the cloth. Assemble the upper and lower parts of the frame. With a little force, push the top of the frame to the very top.

4. Tuck one of the bottom corners of the frame into the triangle of cloth. This takes a little bit of strength. Handle the other side in the same way. The frame is secured, but this does not mean that the frame will not fall off and will need to be further secured with cord(G) or mesh backpanel(H).

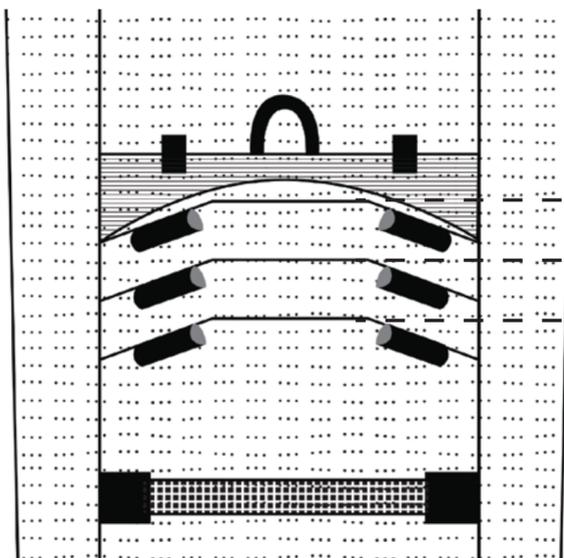

5. Installation of waist pads (D)

6. Two backing options are available, UHMWPE is lighter and more reliable and mesh backing is more traditional.

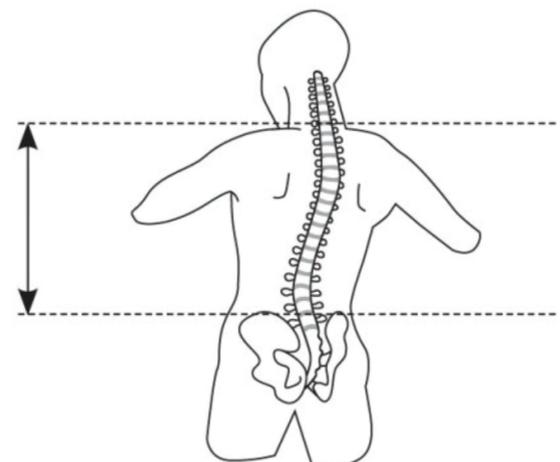

**VERY IMPORTANT:** The cord must be tightened or the aluminium frame may fall off.

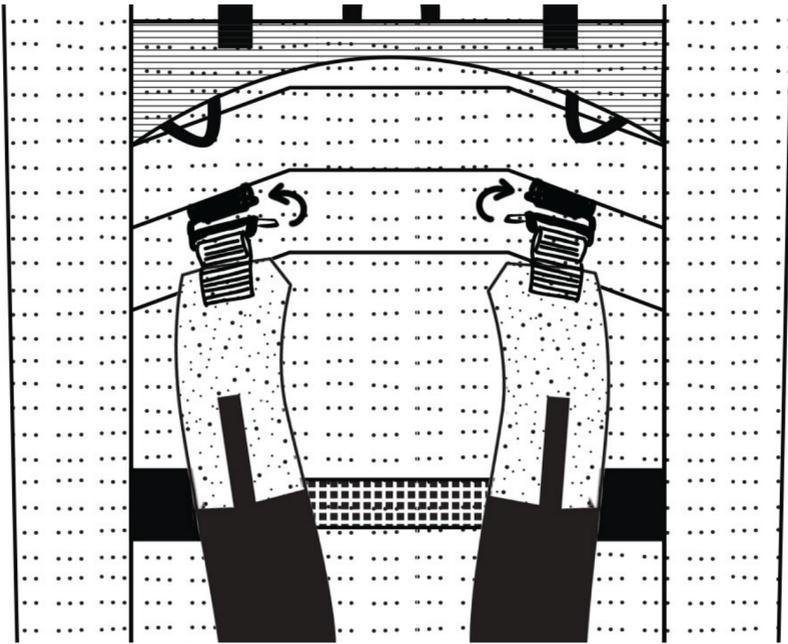

50-60cm/21.6-23.6inch

50cm/19.7inch

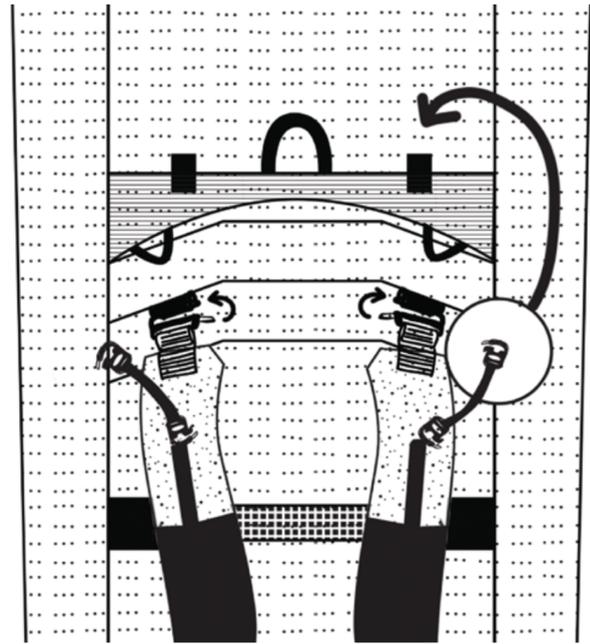

45cm/17.7inch

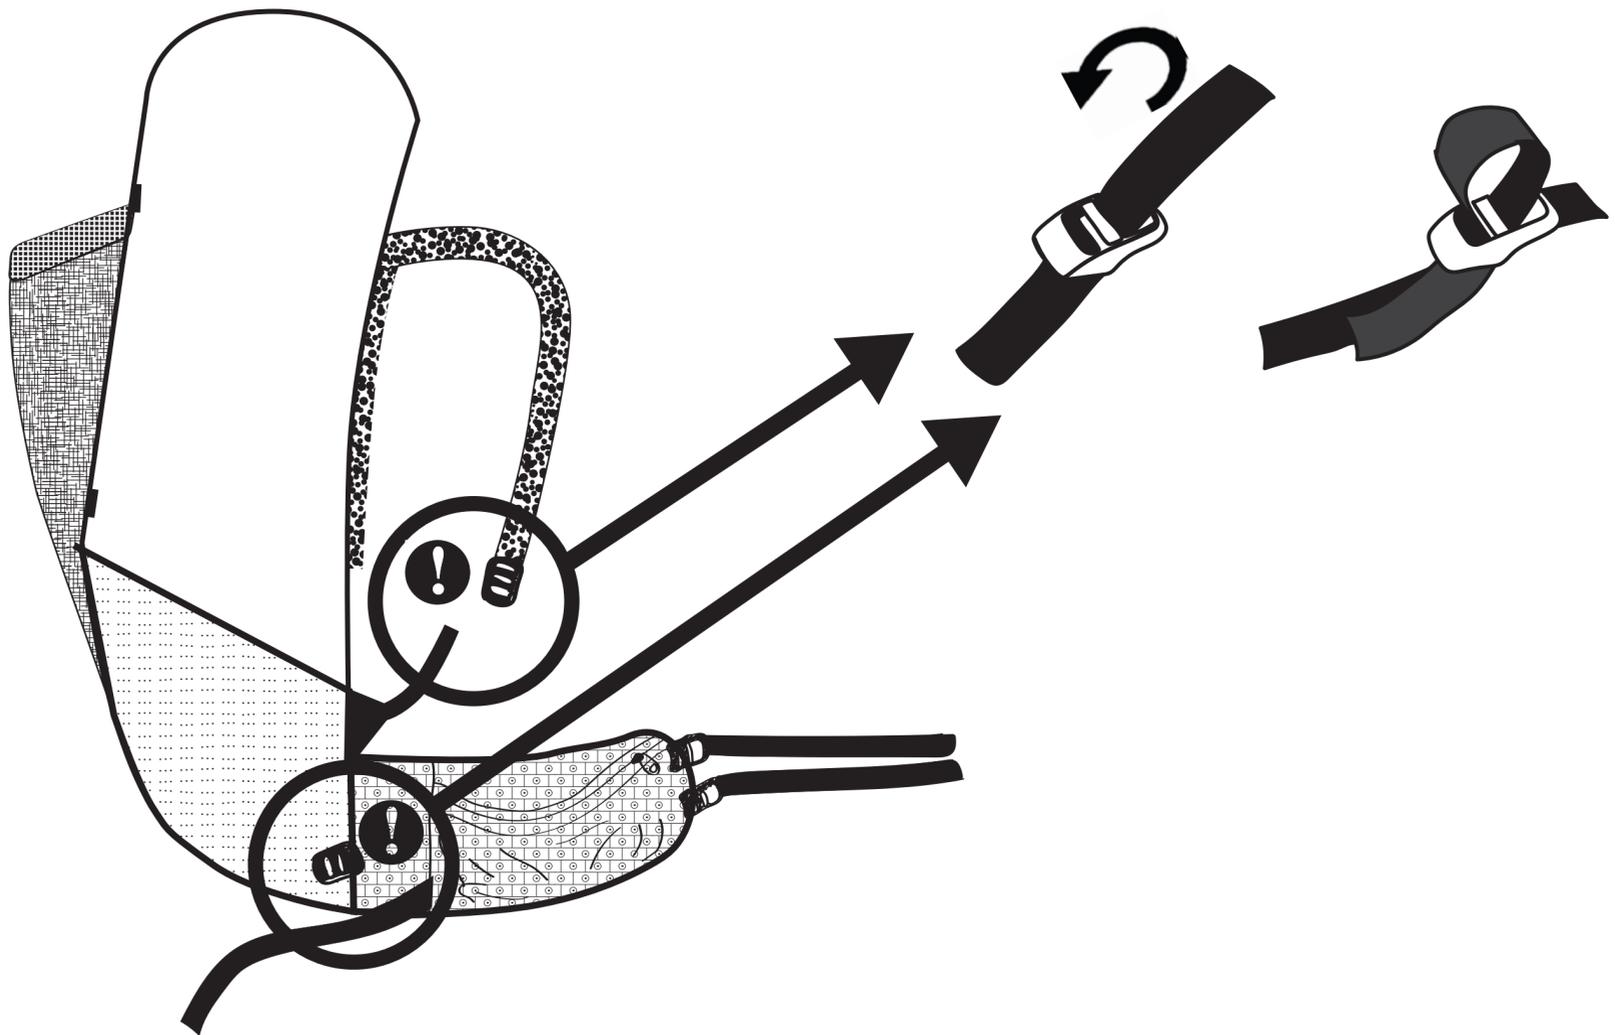

7. Measure the length of the torso and select the corresponding height to install the shoulder straps.

8. Install the shoulder straps, run the cord through the plastic fastener (if the positions overlap)

14. Installation of Load Lifters.

9. To further secure the hipbelt, the black webbing on both sides of the hipbelt needs to be attached to the body of the bag, please link the webbing and plastic fasteners as shown.

Install the plastic fasteners under the shoulder straps as shown.

We offer free lifetime repairs for all tents purchased through 3FULGEAR official stores and Authorized dealers
